Interesting Review on Works of Great Geniuses.

MOST ITALY PRODUCED

How the Florentine Dome Was Originated.

In spite of a temperature rapidly appreaching the zero muck quite a number of the members of the local Chautauqua circles whose fave of art overcame their interni aversion to exposing themselves. the inconveniences of a wintry night,

trudged through the snow and skared along the by sidewillos that lead to the loans of Mr. and Mrs. R. M. Pett, Silvander to an address from Mrs. R. P. Murdeck spake only of the art which was produced in the period from the lith to the lith contures, and instructed her remarks with pictures of the magnetipleces of which she spoke. Prequently dirring the address she held a picture of a funcies paramites or work of residual colors before her art being and the picture of a funcies paramites or work of residuation before her art being andimorphisms. preditecture before her art boying auditors and asked them to tell what the

the amaliest child without injury, and which at once destroys the garms causing that the might examine then closely and thus obtain a bester idea of the subject which had been obscursed. The audience was despit interrusted in the remarks of Mrs. Murdeck, as was embleneed by the

Mrs. Musices, as was evolutionally the particular of the painters analytics and architects of whom Mrs. Musice's spoke were natives of Haly, the country that has preduced more artists than all other lations combined. Mrs. Murdock said to next.

"From the time of Gietto, the artists painted representative types. By this I incan that they did not originate into types, but would take those which had been used before, though each painter put rame originality into them. Some of the painters were very realistic in their work. In one famous picture of the Beautre-tion the dead are copresented as coming from their graves, some with but half of their fiesh on, others incumpletely dictibed, and others with one foot still in the gray. Michael August in the pointers were to the properties the dealer of the results of the problem. The control of the city is interested in having a complete and authorises in the painters by the hullding of the middle agree all painting was on to seemstical subjects. The opportunity withing the painters by the hullding of the patients by the first of the promise and the mail to make the promise with the patients of the promise and the

Weather Prophets Say a Blizzard Is Nigh.

STICKY SYTUDE MERCURY FALLS TO ZERO

Temperature Rose Yesterday During Daylight.

"A bliggard is coming."

That prophesy was telegraphed over the country last night by the United States weather department, and the prediction seems to be well founded, for the advance agent of the coming storm came to Wichita last night on the wings of a strong north wind which sent the mercury down the tube until it was below the zero mark, and which went through an overcost as shough the garment had been made of mesquite nessure. At 1839 o'clock last night the tempera-

At 19:30 o'clock last night the temperature wis one degree above zero. At 11:30 o'clock it was zero, and at 12:30 it was still zero. The fall in temperature becam after sunset, and from that time the abrinking of the official insercury was steady. Yesierdlay was an unusual day from a meteorological point of view. In spite of the fact that the temperature was considereably lower than it had been on the day previous, and regardless of the fact that the weather prophets of the country bad, by their combined offerts, microseded in sending seven-temps of an inch of snow, the temperature during the day steadily rose, and while it was 37 degrees above zero at 7 a. m., and it is in a transition of the country bad, by their combined of the forts, microseded in sending seven-temps of an inch of snow, the temperature during the day steadily rose, and while it was 37 degrees above zero at 7 a. m., and it is in the fact that the weather prophets of the country bad, by their combined of the forts, microseded in sending seven-temps of an inch of snow, the temperature during the day steadily rose, and while it was 37 degrees above zero at 7 a. m., and the microsed of the source of the source, regulate, purify, cleanse and the source, regulate, is the likebest point reached during the ay, and the remarkable thing lies in the

day, and the remarkable thing lies in the fact that the highest temperature is usually about 5 s clock in the afternoon. The weather observers, however, are shie to explain this phenomenon. A low pressure which is always accompanied by high temperature, came from New Maxico and pussed over this city yearering. Last night a high pressure from the northwest began to approach Wichelbe believe with it a full in temperature than the heads with it a full in temperature than the heads with it a full in temperature.

ita, bringing with it a fall in temperarain was falling and as the water fell on the payement it was frozen. There will be a snow aform today that will sur-pass all previous records for the year

of procible, than are of the previous numbers, and every citizen of the city is interested in having a complete and authorite directory.

The work of printing and binding the directory will be done in the Eagle photocome and the work will be first-class in Douglas avenue at 10 o clock presented.
